Moulded Cords & Cables

Established 20 years ago MCC is one of the country's leading independent suppliers of international plugs, moulded cables and power cords designed for the global business market.

As specialists in international power system components, it is our commitment to customer service that drives us to continually provide our customers with the most up to date products and advice on meeting new international standards and regulations. Please visit our new website www.mcc-cables.com for the latest product information and industry guidelines.

We pride ourselves on quality and service and are QMS accredited to BS EN ISO 9001:2000 standards. We carry large quantities of international cord sets, connectors and a large range of re-wirable plugs and sockets in stock which are available on a next day delivery service. Our sales team are available on 01344 868200 for more information and advice.

In keeping with our determination to bring our customers the latest technology and advice on new international standards we have introduced a new range of power cords approved for Saudi Arabia.

**Call our sales team
today for friendly help
& advice or to find
out more.**

The Saudi Authorities have clarified that there will be no further extensions with regard to the requirements for electric plugs and sockets to meet new Saudi standards SASO 2203 and SASO 2204. Implementation of these new standards is now mandatory on new electric equipment needing mains electrical supply and power cords therefore all electrical plugs and sockets now need to comply with these standards.

**MCC are proud to announce that we
now have a range of SASO certified
power cords available designed to
meet the following standards:
SASO 2203: 2003, SASO 433: 2003,
SASO 2204: 20035.**
