## How to Wire a 2Pin Euro Plug. (STK15)

© MCC Ltd 2012

**ELECTRICITY CAN KILL!**  
If you are in any doubt at all about what you are doing,  
or your ability to do the work, you should refer any  
mains connection work to a qualified electrician.

### Wiring up a 2.5A 2 Pin Euro Plug.

This plug comes in two parts, the outer case and inner pins.

This plug is non re-wire able, therefore once you have completed the process the plug cannot be removed unless cut off. The plug is for HO3VV-F2G0.75 cable, and is rated at 2.5A.

1. Place the outer case on the cable.
2. Strip the cable outer sheath 20mm and inner 5mm.
3. Twist the conductors to make a neat tight end.
4. Place the conductor into the terminals and crimp tight making sure the termination is secure.
5. Close the clamps around the outer sheath slide the outer case down the cable over the clamps until it snaps into place.
