How to Wire a Australian Plug. (STK185)

© MCC Ltd 2010

ELECTRICITY CAN KILL!
If you are in any doubt at all about what you are doing, or your ability to do the work, you should refer any mains connection work to a qualified electrician.

Wiring up an Australian Plug.

1. Unscrew the outer case and remove, unscrew cable clamp and unscrew required terminal.
2. Place the Strain relief on the cable.
3. Strip the cable according to Figure 1.
4. Connect the cable to the correct terminals and fasten screws to hold in place.
5. Place the Strain Relief inside the body.
6. Screw Cable clamp over the cable making sure its clamped over the cable outer.
7. Replace the Lid and fasten screw till tight.

Figure 1.
